Important Questions	Answers	Why This Matters:
What is the overall deductible?	Network: \$0 Non-Network: \$200 Individual / \$500 Family Per policy year. Copays, prescription drugs, and services listed below as "No Charge" do not apply to the deductible.	You must pay all the costs up to the deductible amount before this plan begins to pay for covered services you use. Check your Summary Plan Description to see when the deductible starts over (usually, but not always, January 1st). See the Common Medical Events chart for how much you pay for covered services after you meet the deductible .
Are there other deductibles for specific services?	No. There are no other deductibles .	You must pay all the costs for these services up to the specific deductible amount before this plan begins to pay for these services.
Is there an out-of-pocket limit on my expenses?	Network: \$500 Individual / \$1,250 Family Non-Network: \$1,200 Individual / \$3,000 Family	The out-of-pocket limit is the most you could pay during a coverage period (usually one year) for your share of the cost of covered services. This limit helps you plan for health care expenses.
What is not included in the out-of-pocket limit?	Premium, prescription drug copays, balance-billed charges, health care this plan doesn't cover, and penalties for failure to obtain pre-notification for services.	Even though you pay these expenses, they don't count toward the out-of-pocket limit .
Is there an overall annual limit on what the plan pays?	No. This policy has no overall annual limit on the amount it will pay each year.	The Common Medical Events chart describes any limits on what the plan will pay for specific covered services, such as office visits.
Does this plan use a network of providers?	Yes, this plan uses network providers . If you use a non-network provider your cost may be more. For a list of network providers , see www.myuhc.com or call 1-877-440-5983 for a list of network providers .	If you use a network doctor or other health care provider , this plan will pay some or all of the costs of covered services. Be aware, your network doctor or hospital may use a non-network provider for some services. Plans use the term network, preferred , or participating for providers in their network . See the Common Medical Events chart for how this plan pays different kinds of providers .
Do I need a referral to see a specialist?	No.	You can see a specialist or a Primary Care Physician you choose without permission from this plan.
Are there services this plan doesn't cover?	Yes.	Some of the services this plan doesn't cover are listed under Services Your Plan Does NOT Cover. See your Summary Plan Description for additional information about excluded services .

- **Co-payments (copays)** are fixed dollar amounts (for example, \$15) you pay for covered health care, usually when you receive the service.
- **Co-insurance (co-ins)** is *your* share of the costs of a covered service, calculated as a percent of the **allowed amount** for the service. For example, if the plan's **allowed amount** for an overnight hospital stay is \$1,000, your **co-insurance** payment of 20% would be \$200. This may change if you haven't met your **deductible**.
- The amount the plan pays for covered services is based on the **allowed amount**. If a non-network **provider** charges more than the **allowed amount**, you may have to pay the difference. For example, if a non-network hospital charges \$1,500 for an overnight stay and the **allowed amount** is \$1,000, you may have to pay the \$500 difference. (This is called **balance billing**.)
- This plan may encourage you to use network **providers** by charging you lower **deductibles**, **co-payments** and **co-insurance** amounts.

About these Coverage Examples:

These examples show how this plan might cover medical care in given situations. Use these examples to see, in general, how much financial protection a sample patient might get if they are covered under different plans.

This is not a cost estimator.

Don't use these examples to estimate your actual costs under this plan. The actual care you receive will be different from these examples, and the cost of that care will also be different.

Questions and answers about Coverage Examples:

<p>What are some of the assumptions behind the Coverage Examples?</p> <ul style="list-style-type: none"> • Costs don't include premiums. • Sample care costs are based on national averages supplied to the U.S. Department of Health and Human Services, and aren't specific to a particular geographic area or health plan. • The patient's condition was not an excluded or preexisting condition. • All services and treatments started and ended in the same coverage period. • There are no other medical expenses for any member covered under this plan. • Out-of-pocket expenses are based only on treating the condition in the example. • The patient received all care from in-network providers. If the patient had received care from out-of-network providers, costs would have been higher. • If other than individual coverage, the Patient Pays amount may be more. 	<p>What does a Coverage Example show?</p> <p>For each treatment situation, the Coverage Example helps you see how deductibles, co-payments, and co-insurance can add up. It also helps you see what expenses might be left up to you to pay because the service or treatment isn't covered or payment is limited.</p>	<p>Can I use Coverage Examples to compare plans?</p> <p>✓ Yes. When you look at the Summary of Benefits and Coverage for other plans, you'll find the same Coverage Examples. When you compare plans, check the "Patient Pays" box in each example. The smaller that number, the more coverage the plan provides.</p>
	<p>Does the Coverage Example predict my own care needs?</p> <p>✗ No. Treatments shown are just examples. The care you would receive for this condition could be different based on your doctor's advice, your age, how serious your condition is, and many other factors.</p>	<p>Are there other costs I should consider when comparing plans?</p> <p>✓ Yes. An important cost is the premium you pay. Generally, the lower your premium, the more you'll pay in out-of-pocket costs, such as co-payments, deductibles, and co-insurance. You should also consider contributions to accounts such as health savings accounts (HSAs), flexible spending arrangements (FSAs) or health reimbursement accounts (HRAs) that help you pay out-of-pocket expenses.</p>
	<p>Does the Coverage Example predict my future expenses?</p> <p>✗ No. Coverage Examples are not cost estimators. You can't use the examples to estimate costs for an actual condition. They are for comparative purposes only. Your own costs will be different depending on the care you receive, the prices your providers charge, and the reimbursement your health plan allows.</p>
